## EXPERIENCE

---

**Emburse Inc.**, Montréal, Québec

August 2022 – Present

*Level 2 Software Developer, Full-time, Remote*

- Full-stack Python developer for the Emburse Cards Django web app, responsible for implementing new features, addressing technical debt, participating in on-call rotations, undertaking deployments, writing unit and integration tests, planning projects, responding to emergencies, and performing code-reviews.
- Contributed over 85% of the work on an urgent security project to protect our application against fraudulent activity by using two-factor authentication and monitoring user login activity.
- Led a certification process where I was the sole representative for my team in calls with Apple and Stripe that involved performing various actions on our backend at the request of a third-party tester.
- Independently planned a Jira epic to migrate away from “public key” authentication in our Plaid Inc. integration.
- Created an internal tool for exporting foreign exchange and cross border fees for our clients, and a cron job for charging them at the end of their pay periods.
- Achieved a promotion from Level 1 to Level 2 software engineer.

**NatuR&D**, Victoria, British Columbia

August 2024 – Present

*Software Developer, Part-time (4-8 hours a week), Remote*

- Full-stack JavaScript developer on a team of two people for the Resilient Urban Systems and Habitat, or RUSH, Initiative, co-responsible for the high-level requirements design, project planning, and implementation of a backend for the website.
- Check out the website <https://whatstherush.ca>, or GitHub <https://github.com/naturnd-rush/rush-cms>.

**SKYTRAC Systems Ltd.**, Victoria, British Columbia

May – September 2021

*Junior Software Developer, University Co-op, Remote*

- Spearheaded the development of a new Java application for scheduling, packaging, and sending emails to customers based on their account’s notification settings.
- Created CI/CD pipelines, Docker images, and unit-tests to streamline application deployment.

## EDUCATION

---

**McGill University**, Montréal, Québec

September 2018 – May 2022

*Bachelor of Arts and Science (B.A. & Sc.) Honours Cognitive Science, Bachelor of Arts, Minor Computer Science.*

- CGPA 3.55/4.00. Graduated with *First Class Honours* in May 2022.
